

**SeaBob Cayago F7, price upon request**  
Reach the reef (or the bottom of your pool) and still have some energy left with this 7-horsepower diving scooter. Aside from the fact that it's the world's fastest (it can reach 13.7 mph over water, which allows you to do super-quick dolphin dives across the ocean), we love that the F7 is powered by an eco-friendly battery pack. ## THE LIFE AQUATIC

COOL DOWN WITH THESE 10 SEA- AND POOL-WORTHY TOYS THAT'LL MAKE FOR A SWIMMING SUMMER.

by JESSICA DAYNOR

**Sea-Doo RXP-X 255, \$12,999**  
Officially the planet's fastest wave runner, this 255-horsepower beast boasts the company's most powerful engine ever and a silver race-inspired design that puts other PWCs to shame. [www.seadoo.com](http://www.seadoo.com).

**Folbot Citiböt, \$1,094**  
Folbot kayaks are as versatile as they come: They're available in eight colors and eight models, and they fold down to mere inches. We like the new 10-foot Citiböt, which weighs just 24 pounds. [www.folbot.com](http://www.folbot.com).
